SUMMARY

Master's student in Information Systems (GPA: 3.7) with hands-on Java development experience and a solid foundation in Object-Oriented Programming, Data Structures & Algorithms, and SQL. Comfortable working across the backend, from authentication and business logic to database design, with growing exposure to AWS and cloud-ready application development. Seeking a Junior Java Developer role to keep building scalable, well-structured software.

TECHNICAL SKILLS

Languages: Java, Python, C

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs

Frameworks: Spring Framework, Spring Boot (in progress)

Databases: SQL, MySQL

Cloud: AWS (EC2, S3)

Tools & Version Control: Git, GitHub, VS Code, Linux

PROFESSIONAL EXPERIENCE

Java Developer Intern

April 2023 – July 2023

Fratello InnoTech Pvt Ltd | Hyderabad, India

- Developed an online voting system in Java, applying Object-Oriented Programming (OOP) principles and core data structures.
- Implemented user authentication, vote-validation logic, and backend business rules to ensure secure, accurate transactions.
- Debugged and resolved application defects, improving overall system reliability.
- Collaborated with senior developers across the software development lifecycle (SDLC), following established code quality and review standards.
- Used Git for version control and maintained technical documentation throughout development.

Graduate Research Assistant — AI & Cloud Initiatives

Jan 2025 – Aug 2025

Central Michigan University | Mount Pleasant, MI

- Built Python automation scripts to streamline data workflows and reduce manual processing time.
- Researched large language model (LLM) integration techniques for automated data insights and prompt engineering.
- Developed cloud-ready application components following AWS best practices (EC2, S3).
- Studied generative AI frameworks to support backend and data engineering coursework.

PROJECTS

AI-Enhanced Data Dashboard

- Built an interactive data visualization dashboard in Python and Tableau to analyze structured datasets and surface actionable insights.
- Wrote Python scripts to clean, transform, and preprocess raw data prior to visualization.
- Applied data visualization best practices to improve dashboard usability and support faster decision-making.

Online Voting System

- Designed and built a secure, Java-based voting platform using object-oriented design principles.
- Implemented authentication and vote-validation workflows to protect data integrity.
- Tested and debugged core modules to ensure accuracy and reliability.

IT Asset Management System

- Designed a backend system to track and manage organizational IT assets using structured data models.
- Wrote SQL queries to support efficient asset management and reporting.
- Applied modular, object-oriented design principles to improve maintainability and scalability.

EDUCATION

Master of Science in Information Systems

2024 – 2026

Central Michigan University, Mount Pleasant, MI | GPA: 3.7

Bachelor of Engineering in Electronics and Instrumentation Engineering

2020 – 2024

Velagapudi Rama Krishna Siddhartha Engineering College
